Acrylic

We strive to achieve a high standard of acrylic work to complement our castings. To this end injection moulded high-impact acrylic is used in all cases. All our work is carried out on duplicate models to preserve the masters and ensure an accurate fit. To further improve the quality of our acrylic work both Steve and Rich have attended a course on natural-looking complete dentures convened by Dr. John Besford and Ruth Bourke. This course covered the use of Enigma colour tones, which provide a more natural appearance for removable partial dentures. The best results are achieved if photographs of the patient are supplied for colour matching and aesthetic harmony.

Acetal Resin Products

Acetal Resin (Dental 'D') material is made in all of the currently available Vita shades and three shades of pink for gum restoration work. A variety of products can be made from Dental 'D', but it is most often used for aesthetic clasps and space maintainers. Due to its strength and flexibility in thin section, it is also a good material for the manufacture of gum slips. Clasps can be injected directly, either onto the chrome base or into a finished denture, and new clasps can be added to an existing denture to improve the appearance.

Product	Price (sterling)
Dental 'D' Clasps.	35.00 each
Space Maintainers (2 clasps, 1 pontic)	85.00
Each additional pontic	20.00
Gumslips	from 55.00
Facings	20.00 each
Other procedures are available on request.
